## ORION (LEDCW)

The Orion LED strip lights are the ultimate in versatility at a cost that won't break the bank. The 500mm length LED strip consists of 30 x high intensity LEDs, doubling to 60 LEDs for the 1000mm length strip, that are encapsulated in a weatherproof casing. The LEDs have a 70° lens that allows an excellent spread of light designed to illuminate even the darkest corners. At one metre the 500mm length Orion will give you a light reading of 35 lux, which is the equivalent to a 10W halogen measured at the same height, but the Orion will use 5 times less power than the halogen. The Orion LED strip has been launched as the most adaptable LED light unit available on the market today, so whether you are illuminating lockers, racking, steps or generally improving your interior lighting, the Orion is the perfect solution. The Orion LED strip can be installed in a variety of ways, from simply using an adhesive strip through to fixing clips or brackets..... the choice is left down to you.

Available in Cool White (LEDCW) or Warm White (LEDWW).

Camping version also available.

### SPECIFICATION

ALL DIMENSIONS HAVE A TOLERANCE OF +/- 1mm

Model No		LEDCW500PVI	LEDCW500PVI/2	LEDCW1000PVI
